

IN THE CLAIMS

Kindly amend claim 1 as shown in the following claim listing:

1. (currently amended) An optical holographic device for reading out a data page of a holographic medium, said data page having a staggered structure of data bits, said holographic device comprising a pixilated detector having detector elements organized in a staggered structure, and said staggered structure of the detection elements matching said staggered structure of data bits.
2. (original) An optical holographic device as claimed in claim 1, wherein said structure is a quasi-hexagonal structure.
